

> DEFORM SUPPLIES RHEINMETALL

Rheinmetall Landsysteme GmbH, a major manufacturer of armoured vehicles, is one of Deform's customers.

Deform manufactures several different types of formed protective plates for Rheinmetall. Our special expertise makes it possible to hot form a plate and then restore the steel's properties without the product losing its shape. This saves welding, weight and costs. Furthermore, a correctly formed protective plate is stronger than the equivalent welded design.

We feel there is great potential for further developing such collaborations. The possibilities include not only individual, 3-dimensionally formed plates, but also complete system deliveries that may even involve welding and assembly.

Deform manufactures several formed protective plates for Boxer, the new, highly flexible, modular vehicle system.

Deform manufactures hatches to Wiesel.

Hatch manufactured by Deform.
