

## > DEFORM A SPHERE SUPPLIER WITH LONG EXPERIENCE

**Over the years, Deform has prefabricated and supplied well over 150 spheres to customers worldwide.**

Deform has long experience of sphere prefabrication. We optimise the size of each segment and manufacture in exact accordance with customer wishes. The controlling factors are: the weight of each segment; available plate formats; available press forces; any hot forming requirements; any special wishes regarding welds and welded-on flanges (necks); etc.

Each sphere is unique. Furthermore, with 150 spheres supplied all around the world, we can proudly state that we have all the necessary experience!

▲ Sphere segment in production.

Europe's largest sphere (diameter, 26 metres)  
– made by Deform for Evonik in Germany. ▼
