

## > PROTECTION PLATES FOR RHEINMETALL

Rheinmetall Landsysteme GmbH, a major manufacturer of armoured vehicles, is one of Deform's customers.

Deform manufactures several different types of formed protective plates for Rheinmetall. Our special expertise makes it possible to hot form a plate and then restore the steel's properties without the product losing its shape. This saves welding, weight and costs. Furthermore, a correctly formed protective plate is stronger than the equivalent welded design.

We feel there is great potential for further developing such collaborations. The possibilities include not only individual, 3-dimensionally formed plates, but also complete system deliveries that may even involve welding and assembly.
